Education

George Mason University - College of Engineering & Computing

Aug 2022 – Dec 2026

Bachelor of Science in Computer Science, GPA: 3.73

Relevant Coursework: Data Structures & Algorithms, Database Systems, ML, SWE, Operating Systems

Experience

Founding Engineer

May 2025

TheCollegeTech - Educational Platform Solutions

- Architected and built a comprehensive Learning Management System and implemented authentication, account management, and role-based access control using Supabase, ensuring secure and scalable platform access.
- Designed and deployed course creation, enrollment, and content management workflows, establishing the core functionality of the Learning Management System (LMS).
- Built scalable full-stack applications using TypeScript, React, and Django REST framework, implementing optimized SQL queries with pagination/filtering, and maintaining 95% uptime.
- Collaborated with product/design teams to define requirements, authored comprehensive API documentation, implemented CI/CD pipelines with automated testing, and conducted code reviews.

College of Engineering IT Technician

Jun 2023 – Present

George Mason University - College of Engineering & Computing

Fairfax, VA

- Developed and maintained automation scripts (Python, Bash, PowerShell) for Windows, macOS, and Linux environments, reducing system configuration time and automating deployment across 450+ lab computers.
- Engineered custom Linux server configurations and deployment solutions, creating comprehensive technical documentation and user manuals that improved team efficiency and reduced recurring support tickets by 30%.
- Implemented proactive system monitoring and maintenance protocols across 15-20 computer labs, ensuring 99% uptime through automated imaging, troubleshooting scripts, and software optimization techniques.
- Provided technical support to 200+ faculty and staff while developing internal tools for ticket management and response automation, improving average resolution time by 40% through data-driven solutions.

Projects

Vidya LMS | *React, TypeScript, Supabase, Azure Blob Storage, PostgreSQL*

July 2025

- Developed a canvas-style Learning Management System enabling moderators to create courses, assign instructors, and manage student enrollments.
- Built Supabase-based authentication and role management for users, instructors, moderators, and admins.
- Integrated Azure Blob Storage for scalable storage/retrieval of course materials (PDFs, videos, quizzes).
- Designed relational PostgreSQL schema for users, roles, courses, and assignments, ensuring efficient data consistency and retrieval.
- Implemented a TypeScript/React frontend with dynamic dashboards, assignment tracking, and calendar-based progress visualization.

XPen\$e | *Next.js, Supabase, NFC, Auth0, Google Maps API, Perplexity AI API*

Dec 2024

- Engineered a smart wallet app to maximize credit card rewards by detecting merchant data via NFC and EMV.
- Integrated Google Maps API for merchant location retrieval and Perplexity AI API for personalized reward recommendations.
- Implemented secure authentication with Auth0 and scalable user data storage with Supabase.
- Delivered a seamless, responsive frontend in Next.js for smooth API communication and user experience.

Technical Skills

Programming Languages: Java, Python, C/C++, Kotlin, JavaScript, TypeScript, PHP

Web & App Development: React, Next.js, Angular.js, Django, Flask, FastAPI, Bootstrap, .NET, RESTful APIs

Frameworks & Libraries: Node.js, TensorFlow, NumPy, JUnit

Databases: SQL (MySQL, PostgreSQL), MongoDB, Redis, Firebase, Supabase, Vector Databases, Convex

Cloud & DevOps: AWS (EC2, S3), Microsoft Azure, Git, Linux
